Nomination Form

Public Works Project of the Year Award Small Cities/Rural Communities

Purpose

The APWA Public Works Project of the Year Award is for agencies from cities or counties with a population of 75,000 or less. The Award is given for impact in the community as compared to a dollar amount. The award does not have a fixed dollar amount and can include the following categories: structures, environmental, historic preservation, emergency response, or transportation projects that have created a positive impact on the life of the community.

The Categories which could be included are:

- Building/Structures
- Transportation
- Environmental
- Disaster or Emergency Construction/Repair
- Historical Restoration/Preservation

Eligibility

Public works is defined as the physical structures and facilities that are developed, owned, and maintained by public agencies to house governmental functions and provide water, power, waste disposal, transportation, quality of life projects and similar public services in accordance with established public policy.

To be eligible for nomination, a project must have been “substantially completed” and available for public and/or agency use within two calendar years prior to nomination. If a project has multiple phases or segments, then “substantially completed” will be construed as that point when the final phase or segment is 90% completed and available for public and/or agency use.

Selection

A project may be nominated a maximum of one time for the award in any category.

Criteria to be used in the selection process include:

1. Development of the project to meet a perceived need of the community
2. Use of alternative materials, practices, or funding that demonstrates a commitment to sustainability.
3. Unique or unusual accomplishments under adverse conditions that dictated the defined action.
4. Economic challenges that the community faced and the rationale of the option chosen.
5. Creative use of municipal resources, equipment, labor, or funds that produced measurable benefits to the community.
6. Construction processes that minimize the impact to the community and its residents during construction.
7. Demonstrate awareness of opportunities for environmental preservation during the project and how they were incorporated in the project design and construction.
8. Additional conditions deemed of importance to the public works agency, such as exceptional efforts to maintain quality control and, if value engineering is used, construction innovations as evidenced by time and/or money-saving techniques developed and/or successfully utilized.

Process

Nominations may be made by an agency, company, or individual APWA member. The Judges review the nominations and select the award winner(s). Submittal Fee: \$50 per nomination.

Presentation

Chapter winners are announced at the Annual Meeting on November 14, 2019 and featured in APWA communications.
